- In August 2023, I enjoyed my software journey that I started in August and I still continue to enjoy it. A software developer who likes to tackle product problems with technical solutions and a team player who never stops learning and loves to share his knowledge with others.

Technologies I've used in my projects

- NextJS
- ReactJS
- TypeScript
- JavaScript
- Redux
- Tailwind CSS
- React TanStack Query
- React Native
- Git

Education

- Balıkesir University Faculty of Business Administration

Experience

- I have no any experience for now.

Projects

- My canvas application I created using NextJS, React, TypeScript, Tailwind, Fabric (in progress) (https://github.com/benbugraer/headline-editor-canvas)

- My personal website I created using NextJS, React, JavaScript, Tailwind. (bugraer.vercel.app)

- A small blog I created using NextJS, TypeScript, ReactJS, MDX, Tailwind, Framer-Motion is my project that I created by combining UI components with each other. (combui.tech)

- My canvas application that I am developing with NextJS, TypeScript, ReactJS, Clerk Auth is still under construction. Work on the backend and database continues. I also created an authentication system for the first time in this project. (canvasbel.vercel.app)
